Professional Summary

Highly experienced software developer with 15+ years in web development, specializing in Python and Django. Proven ability to manage long-term projects and deliver quality solutions on time. Strong background in MVC frameworks, with a passion for C++, Unreal Engine, and augmented reality. Continuously exploring and integrating emerging technologies.

Professional Projects

Since Jan. 2024
eksikparca : Freelance contract

Developed an e-commerce panel for «Eksikparça Publishing House» using the «Python - Django - PostgreSQL- Redis» stack.The project includes a real-time notification feature using «Django Channels» and integrates a REST API into the web application with «Celery» for data fetching.

July 2022 - Aug. 2022
Fakir : Freelance contract

Developed responsive HTML product pages within the «TSoft panel».

July 2022 - Aug. 2022
QNB Finansbank Neovade : Freelance contract

Developed investor panel screens as a front-end developer.

Jan 2022 - July 2022
Turyapsahil Realestate Portal : Freelance contract

I developed a real estate portal that can be used by real estate agents both inside and outside the company. The development infrastructure utilized «Python, Django», and «PostgreSQL.» The portal not only connects listings entered by real estate agents with potential clients but also includes an internal communication system for the agents within the company.

June 2022 - July 2022
Pukina E-commerce : Freelance contract

Performed Linux server setup, upgraded WooCommerce and PHP versions, and fixed bugs.

Sept. 2021 - June 2022
Various AR Projects : Freelance contract

Developed AR projects with Unity3d and snapchat.
more info : youtube.com/kadircebel

May 2020 - June 2020
Lesaffre Turquie : Freelance contract

Performed Linux server setup, upgraded WooCommerce and PHP versions, and fixed bugs.

Jan. 2019 - Feb. 2019
Xurcun : Freelance contract

Developed an e-commerce system for Eksikparça Publishing House using the «Python - Django - PostgreSQL» stack.

Dec. 2017 - Jan. 2019
Leapcrowd : My Startup

I served as the lead developer for Leapcrowd, a social network focused on building a core team for startups. The project utilizes the «Python-Django, Django REST Framework (DRF), HTML5, CSS3, JavaScript, and jQuery»

Django
2019 - Present
« Proficient »

Celery
2020 - Present
« Intermediate »

Django Channels
2022 - Present
« Intermediate »

DRF / FastApi
2024 - Present
« Beginner to Intermediate »

Programming Languages

Python
2019 - Present
« Proficient »

C++ / C
2024 - Present
« Beginner »

Javascript
2009 - Present
« Advanced »

Databases

Postgresql / Postgis
2019 - Present
« Proficient »

Redis
2020 - Present
« Intermediate »

Mysql / MariaDB
2018 - Present
« Intermediate »

Web Technologies

HTML / CSS / SCSS
2008 - Present
« Advanced »

JQuery
2008 - Present
« Advanced »

Wordpress Coding
2020 - Present
« Proficient »

Learning & Practicing

Unreal Engine / C++
Beginner, 2023 - Present
« Beginner »

Unity3d / C#
2022 - Present
« Junior »

Augmented Reality / ARCore
2021 - Present
« Beginner to Intermediate »

Previous Experience

ASP.NET / .NET MVC / Razor
2012 - 2019
« Senior »

C# / LinqToSql / EF
2012 - 2019
« Senior »

MS SQL Serv. / IIS / VBasic
2011 - 2019
« Senior »

Certificates

Professional Projects

March 2014 - May 2015
Fipresci - Mingus Agency : Sr. Software Developer
I contributed to the development of the new website for FIPRESCI
on the occasion of its 90th anniversary, utilizing «.NET MVC 4 (Razor Syntax),
MS SQL 2008, LinqToSql, Entity Framework» on the back-end, and «HTML5, CSS3,
jQuery, and JavaScript on the front-end.» The site hosts extensive data and
features a secure member-only section for global communication among
FIPRESCI members.

Apr. 2013 - May. 2014
Ebrd Istanbul Business Forum : Sr. Software Developer
I developed a Web Streaming platform for the EBRD 2013 Annual Meeting and Business
Forum Istanbul, facilitating live streaming across 6 channels in 6 languages. Users
accessed the broadcast by providing their information and selecting a language.
Technologies used included «.NET MVC 4, MS SQL 2008, HTML5, CSS3, jQuery,
and JavaScript.»

July 2013 - May 2014
Lufthansa In Touch : Sr. Software Developer
I contributed as a software developer to the launch of a new worldwide website for
GTS Group, a division of LUFTHANSA headquartered in Berlin. The site includes a
"Human Resources Management System" enabling applicants to apply for jobs at
7 different GTS Lufthansa centers independently, with each center having control
over its own system. Technologies used encompass «.NET MVC 4 (Razor Syntax),
MS SQL 2008, LinqToSql» on the back-end, and « HTML5, CSS3, jQuery,
JavaScript» on the front-end.

Nov. 2012 - March 2014
Wingscard AKBANK : Sr. Software Developer
As a software developer, I played a key role in completing the website for Akbank
Wings Card, dividing it into two separate sections named Info and Style within
wingscard.com.tr. The site allows users to access information about their Wings Card,
query and calculate their Miles, or apply for a Wings Card. Technologies used include
«.NET MVC 4 (Razor Syntax), MS SQL 2008, LinqToSql - Entity Framework» on the
back-end, and «HTML5, CSS3, jQuery, JavaScript» on the front-end.

Education

2011 - 2012
Bilge Adam Academy
Database and Software Developer « 96.40/100 »

2010 - 2011
Ege University
Computer Programming « 76.40/100 »

2009 - 2010
Selçuk University
Computer Programming « 79/100 »
